THE MANAGEMENT COMMITMENT AND QUALITY POLICY

MÉCANINDUS' vocation is to industrialize, manufacture and distribute assembly, fastening solutions and wear parts.

To ensure the long term existence of the company and the employments it provides, we are committed to a Quality approach whose objective is to meet the expectations of our customers, suppliers, employees and shareholders, that is to say all the speakers whose meeting contributes to our development.

The responsiveness of our organization, our adaptation ability to the demand, the availability and flexibility of our staff, our preoccupation for the environment and safety, the measurement of our results as the analysis of their evolution are valuable tools to move up the learning curve where our teams are leading so far.

In order to preserve and develop our business in a contest of globalization, we have implemented a long-term strategy, and are now active in France, Germany, Czech Republic, U.S.A and China.

This growth policy should allow us to enter new markets, improve our cost control, in order to advance our skills, our capabilities, and thus reduce the overall risk for our customers, our staff and all of our partners.

The quality policy that results from this commitment is based on 3 main axes:

- the improvement of customer satisfaction, quality and lead time performance;*
- the consolidation of our know-how through the development of skills;*
- the compliance with legal and regulatory requirements.*

Aware that this approach is crucial, we decided to make "Quality" a priority through the commitment of the management, the process pilots and all the staff.

The Quality Manager, the customers' privileged contact, is the guarantor of the functioning of our quality system and its evolution as much with the internal needs as with those of our customers.
