Conflict Minerals

As defined in the 2010 United States of America legislation
Dodd-Frank Wall Street Reform & Consumer Protection Act
Section 1502(e)(4)

MECANINDUS (unique identification number DUN 281200238) certifies and declares that none of the materials (or their derivatives) listed below are required for the functionality or production of the company's products that we manufacture or contract to manufacture:

Tantalum (Ta), gold (Au) or tungsten (W).

However, we have delivered to our customers a small number of specific components manufactured in brass* which contains 0.05% tin (Sn) or phosphor bronze** which contains 6.25% tin (Sn). This concerns only four references and affects two of our suppliers.

Our company MECANINDUS does due diligence in its supply chain to ensure that Sn does not come from conflict zones. Currently, all virgin Sn is purchased from metal traders who guarantee the origin of their virgin tin and not for scrap containing tin.

(*) *Customers in arms industry*
(**) *COMAP*
